
Greener Glenview Bulletin

November 23, 2021

Welcome to the first Greener Glenview Bulletin! Each issue will focus on information, ideas, and events about environmental sustainability.

Our Next Event: Green Drinks Glenview

Join us for **Green Drinks Glenview** on Monday, December 6 @ 7:00 PM at Grandpa's! (No, the drinks aren't green, but the conversation is!)

Green Drinks is an international phenomenon where people who care about the environment get together to socialize, share ideas and concerns, and enjoy a short program. The event is free. We'll have a cash bar starting at 7:00 and begin the program around 7:30. You can leave after the 20-minute program or stay and enjoy the company!

WHEN: Monday, December 6 from 7:00 to 8:30

LOCATION: Grandpa's Place on Prairie Street (downtown)

Here's our program:

Village of Glenview Winter Preparedness:

How does the village balance environmental stewardship in the winter with safety and fiscal responsibility? How do the de-icing agents affect parkway trees? What are best management practices in responding to snowy and icy weather? Public Works Director Phil Perna and Deputy Director Joe Kenney will address these questions and offer advice on minimizing damage to your property from ice melt products. Bring your questions about winter readiness and other issues in the domain of public works!

Let us know if you are coming on December 6. [Sign up here](#). Hope to see you there.

[Check out more events](#) on our website.

In Case You Missed Our October 27 Kickoff

We were very excited to have over 30 people attend! If you weren't able to come, check out the two posts on our website about the meeting.

If you have any questions about the meeting, [get in touch](#).

Spotlight: Lead Pipe Replacement

Lead: An Unseen Local Public Health Issue

Lead is a potent neurotoxin and its presence in water service lines pose a hidden hazard in every community's drinking water supply.

Illinois has more lead service lines than any other state. To address this issue and make our water supply safer, Governor Pritzker recently signed the [Lead Service Line Replacement and Notification Act](#), making Illinois the third state in the country to enact such a law. This law requires the replacement of lead service lines.

[Read more](#) about water quality in Glenview and learn about potential lead pipes in local homes.
